

# Bucket Destacker

The universal Bucket Destacker is suitable for every type of bucket. Round, oval or any other dimensions. The machine unstacks the buckets and fills them with a pre-set amount of water.

So the Bucket Destacker is not just an unstacker, but also a filler. The possibilities even range to phased adding of plant food. The machine can be freely programmed for any dimension and shape of bucket. And it is entirely made

of stainless steel, with a robust construction. The Bucket Destacker thus has a very attractive total cost of ownership, due to its long service life.

### Features of the Bucket Destacker

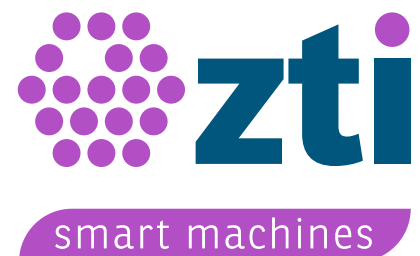

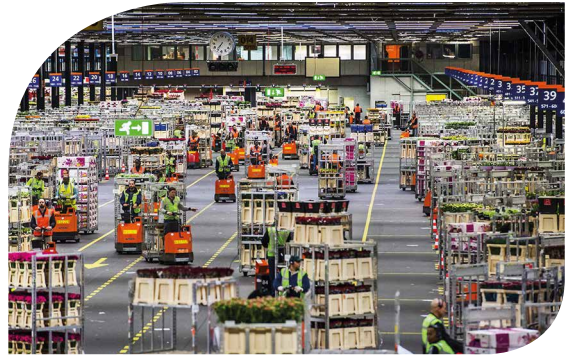

- Capacity: 600 buckets per hour
- Suitable for all types of bucket
- Made entirely of stainless steel
- Machine dimensions: 1050 x 1070 x 2290 mm (L x W x H)

### Features of all our processing machines

- Careful treatment and processing improves the shelf life
- High processing capacity
- Maximum yield per processed product
- Equals or better manual processing
- Visually attractive end product
- Easy to clean and to service
- Meet European guidelines for the food-processing industry in relation to hygiene and safety

### Features of all ZTI smart machines

- Smart innovations that are distinguished by their simplicity
- Simple and safe to operate
- Equipped with the latest technology
- Optimum balance between 'mechanics' and 'electronics'
- Attractive recovery of investment time

The logical solution for your challenges
