

Super Sealer

The quickest sealer of cut-flower packaging is the Super Sealer. The wrapping for roses (including those for import) in particular make this a popular choice of flower-packaging machine.

Pretty much all flower bunch lengths and diameters can be wrapped automatically in cellophane without the need for adjustment. The Super Sealer can be linked to a registration

system specially developed by ZTI, allowing the entire production to be properly analysed and, where necessary, adjusted.

Features of the Super Sealer

- Capacity: 1200 bunches per hour
- Stand-alone use, or can be integrated behind the flower line or hang line
- Processes practically all bunch lengths and diameters
- Packs in cylindrical wrap
- Additional registration system available
- Particularly suited to packaging and re-packaging roses
- Free choice of cellophane
- Minimum seal width ensures maximum cellophane exposure
- Machine dimensions: 3100 x 1700 x 1800 mm (L x W x H)

Features of all our flower-processing machines

- Careful treatment and processing improves the shelf life
- High processing capacity
- Maximum yield per processed product
- Equals or better manual processing
- Visually attractive end product
- Easy to clean and to service
- Meet European guidelines for the food-processing industry in relation to hygiene and safety

Features of all ZTI smart machines

- Smart innovations that are distinguished by their simplicity
- Simple and safe to operate
- Equipped with the latest technology
- Optimum balance between 'mechanics' and 'electronics'
- Attractive recovery of investment time

The logical solution for your challenges
